## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to claim 1, line 4, "the longitudinal" should read --a longitudinal--.

In lines 6-7, the tube is unsealed at the lower end of the tube exclusive of the notches. It appears that "the notches" should read --the lower end--.

In claim 5, line 2, it appears that the cap is a separate piece with respect to the tube, securable to the tube by means of glue or the like. Note that the applicant has recited in claim 1 that the upper end includes a cap.

With respect to claim 6, the applicant has failed to recite/claim any method steps, i.e., "the step of...".

Were the applicant to properly address the rejection of claim 1, the claim would be in condition for allowance, as the prior art fails to teach or suggest the tube having a cap with a drill bit embedded therein, the lower end of the tube having a pair of notches extending longitudinally, the notches lying on a single diametrical line, i.e., symmetrical about a center axis of the tube.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3634

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Uecker et al #2,203,114. Uecker et al disclose a scaffold jack assembly comprised of scaffold vertical leg 11 that receive screw jack 14 therein, the screw jack also received within socket/nut 20, operation thereof by means of handles 30 allowing for vertical displacement of the scaffold leg.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nealeigh #5,778,999, Tooley #4,122,645, Morris #4,004,393, Anderson #4,741,505, Morris #4,026,079, and D'Alessio #4,481,748 are cited to teach screw jack assemblies.
